GRAND CENTRAL TO PAY \$25,000

Usual Monthly Dividend Was Declared Yesterday.

KIMBERLEY-SNYDER COMPANY

BALAKALALA COPPER MINES INCORPORATE FOR \$10,000,000.

The directors of the Grand Central company met in Provo yesterday afternoon and declared another dividend of 10c a share, or \$25,000, on the capital stock of the corporation. Distribution will be made on Wednesday next, the 20th, while stock transfer books close on Monday evening. This is the nineteenth dividend paid by the company and makes the total to date \$706,250.

Now that the deal with the Bingham company is apparently off for good there is every reason to believe that the Grand Central company will continue to pay regular monthly dividends in the amount ordered yesterday, as the mine is in condition to supply the ore necessary without any particular effort.

The minority shareholders in the company have been praying all the time that the sale of the control of the company would not be consummated and there is a general belief that the majority interests are more than satisfied that the sale was not consummated. The directors of the Grand Central

ORGANIZE \$10,000,000 COMPANY Kimberley-Snyder Combination Pre-

paring For Big Business.

Willard F. Snyder, president and get ral manager of the Western Exploration company, returned from a month's trip to California yesterday morning. The most important news that he had to communicate was that his company had exercised its option on the great Balakailal consulting the property of the was of the company will have it no company, returned from the great power at say been incorporated undiliver have already been exposed. The great power was been incorporated undiliver have already been incorporated undiliver have capitalization being represented by 200,000 shares of the par value of \$50 acc. Pt. L. Kimberley is president; C. A. Madim of San Francisco, vice president and treasurer; Williard F. Snyder, general manager. These, with C. D. Porter and Sig. Will of San Francisco, comprise the board of directors.

Mr. Snyder says a large force of men is employed in developing the mines, and the intention of the company is to build a smelter at the mines capable of handling at least 1,000 tons of oole per day. Engineers have already gone to work on the plans for the mammoth plant, and, if possible, the company will have it in commission a year hence.

At the Red Cross gold property, near Nevada City, Mr. Snyder says the twenty-four stamp milli is now pounding away on 100 tons of gold ore every twenty-four hours and good results are being obtained. Shortly after reaching home he received a wire from Superintendent Ensensperger advising him, that the vein had been opened in the new lover tunnel and that sixteen feet of good looking ore was exposed. This tunnel taps the vein at a vertical depth of 300 feet or more beneath the surface, and insures a large stoping area.

After a three or fours days' stay to clear his table of accumul

THE MINES AT MACKAY.

New Manager For White Knob-

Strikes in That and Other Mines.

Mackay. Ida.. May 14.—The new manager of the White Knob Copper company. Arthur W. Jenks. will arrive in Mackay June I. Mr. Jenks is a thorough mining and milling man, and at present is the head of the Minera de Penoles mines at Durango, Mexico. Another good strike of ore was made in the White Knob this week, the vein cross-cutting twenty-five feet. This strike and the vein opened last February make 115 feet of solid ore. A force of carpenters is at work at the smelter building ore bins to be erected at the mine.

The streets of Mackay are little fit for travel owing to the repairing and extension of the waterworks system. Master Mechanic Sweeney having a large force of men lowering the mains below freezing point and running pipes to places of business and residences.

Dr. J. D. Woods returned yesterday from Wild Horse, where he had been in specting the property of the Boulder Mining & Milling company. The dector brought in one piece of lead and silver. A force of men is at work on the property.

A great strike has just been made in Sandy Gilbert's mine, adjoining the White Knob. The ore struck is known as Strikes in That and Other Mines.

bornite and carries 58 per cent copper 15 per cent iron and 27 per cent sul-phur. GRAND COUNTY GYPSUM.

Railroad Into La Sals Would Create

a Market For It.

With the building of a railroad down the Grand river from Cisco or some other point on the line of the Rio Graude Western into the La Sal mining region, says Postmaster Antles of Castleton, a new industry should spring into being. It would be the working of the practically inexhaustible deposits of gypsum which stretch away for miles through the Onion creek canyon to Fischer valley. These deposits, Mr. Antles declares, are the most extensive in the world, perhaps, while in quality they rank with the best. The deposits are very accessible and the mining and preparation of the material for shipment and sale could be carried on at a minimum cost. The material is largely used in the making of fine plaster, for fertilizing and numerous other purposes and, according to the form in which it is sent out, has a market value of from \$4\$ to \$16\$ per ton. Grinding mills are the only kind of machinery needed to handle it. a Market For It.

UTAH STOCKS IN BOSTON. Copper Shares Were All on the Down

Grade Yesterday.

(Special to The Herald.)

Boston, May 15.—The copper share market was very weak today, with sales in United States and Utah Consolidated heavier than for several days past.

	ings. The lowest assay ever obtained from any of the exposures along the vein has been \$6.40 in gold and sliver, while in the deepost shaft the quartz runs \$15.20 in gold and four ounces silver per ton. No work has been done during the winter months, but preparations are now being made to resume operations at the deepest shaft, where a whim will be installed and used until a steam or gasoline hoist becomes a necessity. From three to six feet of quartz is exposed in the shaft workings, the lime hanging wall being followed down with no indications of where the foot wall may be. TINTIC ORE SHIPMENTS. Mines of the District Sent Out 143 Carloads During Week. Eureka, May 15.—Thirteen shippers furnished the output for the second week of this month, with 143 carloads of ore. The output from the Grand Central fell off nearly one-third, but the Mammoth increased more than 100 per cent, and the Dragon iron mine sent out an increased tonnage. There seems to be a strong demand for iron, and the Black Jack is preparing to ship. Shipments were divided as follows: Carisa Carisa Centenuial-Eureka	Joe Bowers	appearance. He says the snow is now beginning to go off rapidly and it will be only a few days till the roads are in condition for heavy hauling. Then the ore will begin to move toward the smelters in generous quantity. Mr. Bettis says the Albion is now working full-handed and that the camp is gradually taking on its usual lively spring aspect. Spring Ailments. There is an aching and tired feeling; the liver, boweis and kidneys become sluggish and inactive, the digestion impaired, with little or no appetite, no ambition for anything, and a feeling that the whole body and mind need toning up. The trouble is that during winter there has been an accumulation of waste matter in the system. Herbine will remove it, secure to the secretions a right exit, and by its tonic effect fully restore the wasted tissues and give strength in place of weakness. 50c at Z. C. M. I. Drug Dept. W. B. 	ings. The lowest assay ever obtained from any of the exposures along the vein has been \$6.40 in gold and silver, while in the deepost shaft the quartz runs \$15.20 in gold and four ounces silver per ton. No work has been done during the whiter months; but preparations are now being made to resume operations at the deepest shaft, where a whim will be installed and used until a steam or gasoline hoist becomes a necessity. From three to six feet of quartz is exposed in the shaft workings, the lime hanging wall being followed down with no indications of where the foot wall may be. TINTIC ORE SHIPMENTS. Mines of the District Sent Out 143 Carloads During Week. Eureka, May 15.—Thirteen shippers furnished the output for the second week of this month, with 143 carloads of ore. The output from the Grand Central fell off nearly one-third, but the Mammoth increased more than 160 per cent, and the Dragon iron mine sent out an increased tonnage. There seems to be a strong demand for iron, and the Black Jack is preparing to ship. Shipments were divided as follows: Cars. Ajax	Joe Bowers	appearance. He says the snow is now beginning to go off rapidly and it will be only a few days till the roads are in condition for heavy hauling. Then the ore will begin to move toward the smelters in generous quantity. Mr. Bettis says the Albion is now working full-handed and that the camp is gradually taking on its usual lively spring aspect. Spring Ailments. There is an aching and tired feeling; the liver, bowels and kidneys become sluggish and inactive, the digestion impaired, with little or no appetite, no ambition for anything, and a feeling that the whole body and mind need toning up. The trouble is that during winter there has been an accumulation of waste matter in the system. Herbine will remove it, secure to the secretions a right exit, and by its tonic effect fully restore the wasted tissues and give strength in place of weakness. 50c at Z. C. M. I. Drug Dept. W. B. 	ings. The lowest assay ever obtained from any of the exposures along the vein has been \$6.40 in gold and silver, while in the deepest shaft the quartz runs \$15.20 in gold and four ounces silver per ton. No work has been done during the whiter months; but preparations are now being made to resume operations at the deepest shaft, where a whim will be installed and used until a steam or gasoline hoist becomes a necessity. From three to six feet of quartz is exposed in the shaft workings, the lime hanging wall being followed down with no indications of where the foot wall may be. TINTIC ORE SHIPMENTS. Mines of the District Sent Out 143 Carloads During Week. Eureka, May 15.—Thirteen shippers furnished the output for the second week of this mouth, with 143 carloads of ore. The output from the Grand Central fell off nearly one-third, but the Mammoth increased more than 100 per cent, and the Dragon iron mine sent out an increased tonnage. There seems to be a strong demand for iron, and the Black Jack is preparing to ship. Shipments were divided as follows: Ajax	Joe Bowers . 01 .01¼ .01 .01¼ La Reine04¼ .05 .05½ .05 .05½ .05 .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05½ .05% .05% .05% .05% .05% .05% .05% .05%	appearance. He says the snow is now beginning to go off rapidly and it will be only a few days till the roads are in condition for heavy hauling. Then the ore will begin to move toward the smelters in generous quantity. Mr. Bettis says the Albion is now working full-handed and that the camp is gradually taking on its usual lively spring aspect. Spring Ailments. There is an aching and tired feeling; the liver, bowels and kidneys become sluggish and inactive, the digestion impaired, with little or no appetite, no ambition for anything, and a feeling that the whole body and mind need toning up. The trouble is that during winter there has been an accumulation of waste matter in the system. Herbine will remove it, secure to the secretions a right exit, and by its tonic effect fully restore the wasted tissues and give strength in place of weakness. 50c at Z. C. M. I. Drug Dept. W. B. GRAIN AND PROVISIONS.

Chicago, May 15.—Business was more active on the board of trade today and the inclination in general was toward higher prices. July wheat closing 11%6 like higher, July corn 1 cent higher and provisions (September) were from 5 to 7½ cents better.

Trading in wheat was of a broader character than of late and the prevailing was a builted one of the second control of the sec

ing prices were firm, due to small receipts and better cables. July being a shade to ½6½c higher at 72½ to 72½ cents, and on a good commission house demand the market soon became quite strong. Numerous reports of damage to the crop by the Hession fly throughout Kansas were responsible for much of the early huying. Selling by scalpers caused a little reaction. July declining to 72½ cents, but the weakness was only temporary, the market quickly responding to the bullish foreign news—reports from Paris stating that the import duty on wheat was likely to be repealed within a short time, which was taken as a confirmation of a shortage in that crop.

There was liquidation late in the day, and after selling up to 73½673½ July closed at 73½ cents, a gain of ½6½c. Clearances of wheat and flour were equal to 305,000 bushels. Primary receipts were 195,500 bushels. against 167,700 bushels a year ago. Exports of wheat and flour for the week, as reported by Bradstreet's equaled 4098 600 bushels. Minneapolis and

n all products.
